Description
The objective of this course is to introduce students to the field of computing and problem solving with the help of an object-oriented programming language (C++). Hence the course will cover many C++ features in detail as needed so students will also be learning a structured programming language. Through the lectures, quizzes, take-home exams, and interactive recitations students will learn how to design algorithms based on object-oriented programming paradigms.

Course Outline
- Week 1: Introduction to Programming Languages, Data Representation (bits and bytes), basic programming structure and concepts: identifiers, literals, symbols, variables, screen input/output (cin and cout)
- Week 2: Basic data types (int,double,char,bool) and basic arithmetic operations with their precedence, first C++ program with Visual MS Studio
- Week 3: Functions with/out return values, function prototypes, parameter passing (pass by value and by reference)
- Week 4: Conditional statements (if-else), nested else-if statements, logical operators (&&, ||, !)
- Week 5: String class, loops (while, for, do-while)
- Week 6: Loops (while, for, do-while), char data type
- Week 7: File I/O, console stream cin, input and output file streams, string streams
- Week 8: Midterm
- Week 9: Structs, enum, vectors/arrays and vector operations: sequential/binary search, insert/delete to a vector
- Week 10: Sorting (selection and insertion sort) and introduction to algorithm complexity analysis, vector of structs, matrix
- Week 11: Classes and objects: using class Robot class with a ready-to-use GUI
- Week 12: Classes and objects: using and modifying existing classes such as Dice, RandGen, Date and Robot
- Week 13: Pointers, linked lists
- Week 14: Recursion

Instructors
- Barış Altop, Office: FENS 2014, e-mail: baris.altop@sabanciuniv.edu
- Gülşen Demiröz, Office: FENS L015, e-mail: gulsen.demiroz@sabanciuniv.edu

Lectures
- CS201A: Monday 08:40-10:30 and Wednesday 12:40-13:30 (Zoom links will be announced)
- CS201B: Monday 13:40-15:30 and Wednesday 16:40-17:30 (Zoom links will be announced)

Course Website
https://sites.google.com/sabanciuniv.edu/cs201
Textbook
NOT available in bookstore anymore but available at the library and online. We may not stick to the textbook all the time, you are responsible for all material covered in class.

Lecture Notes, Codes and Recitation Material
All of the material is distributed here. Folder contents will be updated as you progress through weeks. You need to login as your “sabanciuniv.edu” account to access the files in Google Drive.

Course Tools and Installation guide
- Install Visual Studio 2012 on Windows
- Install Windows 10 & Visual Studio 2012 on macOS
- C++ Programming with Xcode on macOS

Tentative Grading
- Midterm Exam (30%):
- Final Exam (34%): Scheduled by Student Resources
- Take-home Exams (20% total): 6 or more will be assigned and they are not of equal weight
- Quizzes (16% total): 4 or more will be assigned and they are not of equal weight

Important Notice about grading: Weighted average is not the only criterion in letter grading!
- If your exams' weighted average is below 30, you will fail the course even if your total grade is equal or above the overall passing grade. (Having exams’ weighted average greater than or equal to 30 does not mean that you will pass the course.)
- If you miss all of the quizzes, all of the take-home exams, midterm and final exams as well; then you will get an NA grade.
- If you miss the midterm or the final exam and if you do not take the make-up exam for that missing exam; then you will directly get an F grade.

Take-home Exams
There will be 6 or more take-home exams like mini programming projects. They will be assigned and collected at SUCourse+. Recitations will be used for clarification about these. Your programs will be automatically graded by GradeChecker (GC), more details about GC is here.

Quizzes
There will be 4 or more quizzes. All quiz dates will be announced at least one lecture prior to the quiz.

Useful Information about course and FAQ
You can also find them here.
Expectations from Students

- Students are expected to attend all classes, recitations and labs. Learning a programming language is much easier when a person explains it. You have to spend more time to compensate for a missed class. So absenteeism does not buy time.
- Students are responsible for the material covered in class even if it is not part of the lecture notes published on the website (Sometimes we explain some stuff on the board). That is why attendance is important.
- Students are responsible to check their emails (Sabanci University accounts), SUCourse and course website daily for any announcements related to this course.
- **PLAGIARISM WILL NOT BE TOLERATED.**
  - Any act of plagiarism may result in a direct fail (F) of the course.
- If you need to take a medical report for any exam;
  Please read the policies on both plagiarism and make-up exams [here](#).
