Prerequisite: CS201

Description and Objectives

This course aims to provide programming experience and to give advanced programming techniques. In this way, students would be more prepared for data structures and several other junior and senior level CS courses. CS204 is a prerequisite course for several CS courses including data structures. Thus, it is a must course for CS students and students who will take advanced CS courses.

The programming language that will be used in this course is C++; we will use Microsoft Visual C++ 2012 as the development environment. CS204 heavily depends on CS201. Thus, a good CS201 background is needed. We will NOT make a review of CS201 topics.

Topics Planned to be Covered

- Introduction (overview of basic concepts, Visual C++ environment, preprocessor directives, compiler, compiler options, linker, libraries, debugging)
- Pointers and dynamic memory allocation
- Linked lists
- Stacks and queues
- Templates, templated classes and templated functions
- Advanced issues on classes and object oriented programming
- Data representation, bitwise operations
- Inheritance, polymorphism and advanced object oriented design
- Exception handling
- Programming with threads
- Visual programming and graphical user interfaces (if time permits)

Instructor

Dr. Duygu Karaoğlan Altop, UC 1083/1089, duygu.altop@sabanciuniv.edu
Office Hour: TBA.
**Assistants**

Elif Pınar Ön, pon@sabanciuniv.edu
Ethem Tunal Hamzaoğlu, ethemtunal@sabanciuniv.edu
Vedat Peran, vperan@sabanciuniv.edu

All of the office hours will be held online, and the detailed information on the schedule will be available on SUCourse+.

**Textbooks**

**Main texts** are
- "A Computer Science Tapestry" (CS201 Book)

**Reference books** are
- "Starting out C++ Early Objects", 7th edition, by T. Gaddis, J. Walters and G. Muganda
- "Objects, Abstraction, Data Structures and Design using C++", by Koffman and Wolfgang.

**We may not stick to the textbooks; you are responsible for the material covered in class too. Thus, it is very important to attend classes.**

**Schedule**

**Lectures:**
- Tuesday 13:40-15:30 & 16:40-17:30
- Thursday 14:40-16:30 & 17:40-18:30

Lectures will be hybrid: for the students who would like to follow the course physically, the classroom is FENS G032, and for the students who would like to follow the course online, here is the [Zoom link](#).

Extra 1 hour asynchronous lectures will not be delivered weekly. Rather, they will be combined under one topic (probably "data representation, bitwise operations") and delivered in total.

**Labs:**
- A2: Wednesday 11:40-13:30, Friday 11:40-13:30 (Tunal Hamzaoğlu - [Zoom link](#))

All of the labs will be held online. Session links for the labs are as given above.
Tentative Grading (subject to change)

Quizzes 15%
Take-home Exams 20%
Midterm Exam 30%
Final Exam 35%

Please note that the weighted average is not the only criterion in letter grading!

❖ We will have online midterm and final exams. Details regarding the examinations will be announced later.
  ➢ Midterm and final examinations will be proctored online.
  ➢ For proctored exams, your webcam and microphone should be on during the exam. In the case of non-compliance with this and other declared exam procedures, your exam will be void. Make sure to check that your webcam and microphone function properly before the exam.
  ➢ Other details will be announced prior to the midterm/final exams.

❖ At the end of the semester, course grades will be calculated using a predefined point distribution.
  ➢ There is a pre-constructed letter grade - point interval mapping based on the previous semesters.
  ➢ Your grade will not depend on any other students' grade.
  ➢ I have no intention of releasing the letter grade boundaries.

❖ The instructor has the right to have an oral interview for any grading item given in the syllabus. Students who will have the oral interview may be selected randomly or according to a suspicious situation observed by TAs or the instructors.
  ➢ Oral examinations will be done over Zoom, and they will be recorded.
  ➢ During an oral examination, students must (i) keep their camera on at all times, (ii) share their entire screens (not specific tabs or windows), and (iii) answer the questions on the IDE (VS, Xcode, etc.) that they have done their original work on.
  ➢ Performance of the student in an oral examination will affect their grades of the grading item they have been called upon.
  ➢ If a student fails to show up at an oral exam, or does not obey the aforementioned rules, (s)he will automatically get 0 (zero).

❖ There will be at least 4 (maybe more) online pop-up quizzes (exact date/time will be randomized) during the semester. These quizzes will be carried out during the lecture/lab hours. The worst of them will be discarded and the rest of them will have equal weight on grading.
There will be at least 4 (maybe more) programming take-home exams (THEs) during the semester. All of the assigned THEs will be graded and taken into consideration in the overall grade. Each THE will have equal weight in overall grading.

- Your submissions will be graded automatically via GradeChecker, using which you can check your expected grade before submission.
- We might request a demo for your submission(s), and your performance might affect your THE grade(s).
- THE grading will mostly be based on the correctness of the execution; not based on how big the mistake is or how hard you work for it. Thus, please test your code very carefully. No debugging will be done during grading. No code/file changes are allowed after the submission. If you submit the wrong file, then we cannot grade your work.
- If you fail to submit your work via SUCourse+ on time, the corresponding work (i.e. grading item) will be graded as 0. No late submissions, unless stated otherwise!

Contribution of the take-home exams to the overall grade will be calculated according to the formula given below:

\[
\text{take\_home\_grade} = \begin{cases} 
\text{take\_home\_avr} & \text{if } \text{ratio} \leq 2 \\
\text{take\_home\_avr} \times (3 - \text{ratio}) & \text{if } 2 < \text{ratio} < 3 \\
0 & \text{if } \text{ratio} \geq 3
\end{cases}
\]

\[
\text{ratio} = \frac{\text{submitted\_take\_home\_avr}}{\text{weighted\_exam\_avr}} \\
\text{weighted\_exam\_avr} = (0.30 \times \text{midterm\_grade} + 0.35 \times \text{final\_grade}) / 0.65 \\
\text{course\_numeric\_grade} = \text{quiz\_grade} \times 0.15 + \text{take\_home\_grade} \times 0.20 + \\
\text{midterm\_grade} \times 0.30 + \text{final\_exam\_grade} \times 0.35
\]

There won't be any make-up for take-home exams in any case, including medical health reports and official university activities.

If your exams' weighted average is below 30, you will fail the course even if your total grade is greater than or equal to the passing grade of the course.

If you miss all of the quizzes, take-home exams, midterm, and the final exam as well; then you will get an NA grade.

If you miss one of the midterm/final examinations and if you do not take the make-up exam for that missing exam (check the make-up exam policy for details); then you will directly get an F grade, even if your total grade is greater than or equal to the passing grade of the course.
**Exam/Submission Review Policy**

Students are allowed to object to their midterm and final examinations, as well as their quizzes and take-home exams. There will be specific objection hours for midterm and final exams. However, you can only object to your quiz or take-home exam grade within 7 days after the respective grade is announced. Grade bargaining will absolutely not be tolerated.

**Make-up Policy**

No make-ups are allowed for the take-home exams. Students automatically get 0 (zero) from the respective take-home exam grade if any of them is missed.

Make-ups are only allowed for the quizzes and midterm/final examinations. Since there is limited access to health services during this period, any verbal (and legitimate) excuse can be accepted, provided that you contact the instructor beforehand. Any excuses that will be taken into the instructor's account after the quiz/exam will not be considered. **No exceptions to these rules.**

Dates and details of the make-up examinations will be announced later.

**The make-up examinations will most probably be oral.** That is, all of the make-ups will probably be done as a face-to-face online verbal exam.

**GradeChecker Tool**

We apply an automated grading process on the take-home exams. You can use GradeChecker ([https://learnt.sabanciuniv.edu/GradeChecker/](https://learnt.sabanciuniv.edu/GradeChecker/)) to check your expected grade, before submitting your take-home exam. Just a reminder, you will see a character ¶ which refers to a newline in your expected output.

GradeChecker can be pretty busy and unresponsive during the last day of the submission. Thus, leaving the submission to the last minute is not a good idea.

GradeChecker and Sample Runs together give a good estimate of how correct your implementation is. However, we may test your programs with different test cases and your final grade may be different from what you saw on GradeChecker.

Submit your take-home exam via SUCourse+ ONLY! GradeChecker is not considered as a submission. Any other methods (paper, email, etc.) are not acceptable, either.

The internal clock of SUCourse+ might be a couple of minutes skewed, so make sure you do not leave the submission to the last minute. Do not forget that "No successful submission on SUCourse+ on time = a grade of 0 directly for that take-home exam."
**Plagiarism Policy (Academic Integrity)**

Although we encourage the students to work and study together; midterm/final exams, take-home exams and quizzes are expected to be students' own works. Students need to understand the **difference between helping and cheating**. You may share your ideas and knowledge, but you should not (and never) share your script or code. Allowing friends to copy part of an exam or an assignment from your work is not helping. In such a case, both parties will be considered as submitting a plagiarised work, and **such behaviour will have disciplinary consequences for all parties involved**. Additionally, it is the student's responsibility to make sure that the assignment in question is never in publicly accessible locations.

If the submitted assignment (take-home exam) is not done by the student himself/herself, then (s)he will get -100 from that particular assignment. If a student repeats it again, then (s)he will **fail the class**. On the other hand, **if the submitted work is for quiz/midterm/final, then the student will directly fail the course**, even if the plagiarism is only for a single question or even a single part of a single question. **No exceptions will be made to this rule.**

It is the student’s responsibility to ensure that (s)he completely understands any material that (s)he submits and that (s)he is actively engaged in the production of the solution. The instructors and TAs of this course reserve the right to ask the students to explain the reasoning behind their work without the presence of any collaborators **at any time**. The students should know that the **written submitted work is not the only material that will be graded**. The instructors or TAs might **request a viva** (oral exam), and **grade it instead of the written submitted work**.

Additionally, cases of plagiarism will be directly referred to the Dean’s Office for disciplinary action. This course does not tolerate any breach of academic integrity (more info [here](#)).

Please also see the **Plagiarism Policy document** shared via SUCourse+.

**Additional Notes**

Students are responsible for every announcement made in lecture/SUCourse+ or sent via email. Students are expected to check their Sabanci University mail inboxes regularly as important announcements will be sent to them via email. Not attending the class, not following SUCourse, not checking emails regularly is not an excuse, in case they miss something.
Expectations from Students

- Students are expected to attend all classes, recitations and labs. In CS204 you will continue to learn a programming language and it is much easier to learn a programming language when a person explains it. You have to spend more time to compensate for a missed class. So absenteeism does not buy time.

- Students are responsible for the material covered in class even if it is not part of the lecture notes published on SUCourse (sometimes we explain some stuff on the board). That is why attendance is important.

- Students are responsible to check their emails (Sabanci University accounts) and SUCourse daily for any announcements related to this course.

- You must attend the synchronous Zoom lectures, recitations, etc. and real-time online exams with your SU email account.

See SUCourse+ for other information, but this is important:

Plagiarism, Cheating and Exam Trading will NOT be tolerated!
