Course Description: This course provides an introduction to the study of the human experience in the modern world. It brings together the history of major milestones in the modern era, from the mid-18th century to the 21st century, and prominent theoretical frameworks that are employed to analyze this transformative period in the history of our species. SPS 102 is designed to be a follow-up of SPS 101 and thus complements the content and the academic skills that were previously introduced. There are three central aims of this course. The first aim is to present our students the challenges and potential in the scientific study of human experience through the introduction of various analytical tools from disciplines such as history, sociology, anthropology, political science, and economics. The second aim is to provide the intellectual foundations that would help our students to understand the dynamics of the contemporary world around them by historicizing its relatively recent formation in the history of humanity. Finally, this course also aims to emphasize the structured use of language, in this case English, for the purposes of knowledge production and critical analysis. It accepts the role of language in humanities and social sciences as important as calculus is for physics. To that end, it pays special attention to critical reading and writing skills as evident from the course structure.

Grading: the components of the final course grade are as follows:

Midterm examinations:	45%	(1 st midterm 20%, 2 nd midterm 25%)
Writing Assignments:	30%	(Research essay proposal: 5% + Process Essay: 25%)
Discussion sessions:	20%	(Twelve discussion weeks, of which eight are graded, five best will count x 4% each)
In-lecture Top Hat questions:	5%	(Five random <i>Top Hat</i> questions x 1% each)
Bonus assignment:	6%	(Read, listen and record assignment)

Course Requirements: Students are expected to complete the assigned readings before each lecture, attend the weekly lectures, actively participate in discussion sections, take two midterm exams, and submit a research essay proposal and final process essay. No mandatory attendance is taken for the lectures, but students who miss more than six discussion sections (or more than 12 discussion hours) will automatically get a zero from all their discussion section grades. In addition, those who miss five or more discussion sections and both midterm examinations without a valid excuse will fail the course and be considered NA. Attend your discussions on time, late attendance (10 minutes rule) will not be tolerated.

Course Components:

Midterm examinations: There will be two midterm examinations in this course to be conducted face-to-face on campus. In terms of the examination format, each midterm will consist of short questions and long essay questions. Students will be graded based on their comprehension of the content and their ability to formulate analytical arguments based on that content from the readings, lectures, and discussion sections. Please note that only the students with valid excuses approved by the Academic Board decisions will be allowed to take online exams on exceptional occasions. These online exams will be proctored, and your webcam and microphone should be on during the exam. In the case of non-compliance with this and other declared exam procedures, your exam will be void.

Process essay: Students are expected to write an analytical process essay in two steps based on a list of topics that will be distributed to them in the first week of the discussion sections. The first step of this assignment is the submission of a research essay proposal (by Sunday of Week 3). The research essay proposal must be submitted in the form of a video in which you briefly explain the research question you intend to answer in your process essay including some of the sources you find to provide support for your argument. A short written document with your research question and the references for two of your sources must also be uploaded on Sucourse. This is a chance for you to receive feedback on the suitability of your proposed research question and the sources you find. The second step is the submission of a final process essay to SUCourse (Week 6). Students who wish to seek more guidance have the option of submitting a preliminary draft in Week 5 to receive feedback before the submission of their final process essay in Week 6. This step is not mandatory but voluntary and the submitted draft will not be graded. Students are not allowed to submit works that have already been submitted to this course in the past and/or other courses. All steps of this assignment are considered as take-home exams. Each step, except the ungraded draft, is graded separately. Please make sure to read the 'Process essay guidelines' on SUCourse for more details.

Discussion sessions: Discussion sessions are student-centered learning hours conducted by SPS facilitators. There will be a total of twelve discussion sessions. Every discussion session will consist of two hours and of these twelve sections, eight random sections will have graded exercises which will be submitted to SUCourse by the end of the discussion hour. To this end students are expected to bring their (fully charged) laptop or tablet (no phone!) to the discussion class. The five best of these eight will be counted towards your grade. The other four sections will be discussion and skills-learning based meetings. The graded weeks will be worth 4% each. Students are expected to watch the recorded tutorial videos before the discussion sections. Students may also be asked to finish one or more of the assigned readings before the discussion sections. Attendance will be taken regularly during each hour of the discussion sessions. Students who miss more than six discussion sections (or more than 12 discussion hours in total) will automatically get a zero from all their discussion section grades. Students will not be allowed into the discussion sections after ten minutes following the start of the section meeting. No exceptions will be made to this rule.

Lectures: Lectures constitute the backbone of this course. They are central to the design of the course and the content delivered in the lectures will be tested in the midterm examinations. Lecture attendance is not mandatory, but five random in-lecture questions will be asked at random lecture hours throughout the course through the Top Hat system. These are small quizzes that aim to test your comprehension of the lecture and they are not conducted for attendance. Cheating will not be tolerated. Students will not be allowed in the classroom after the first 10 minutes of the lectures. Those who are late to the class and are not admitted to the lecture hall can follow the second hour of the lecture after the break.

Reading assignments: Students are expected to do all required readings. Readings are designed to complement the lectures and discussion sections. A better understanding of any topic is only possible by completing the readings and they are a great source for the process essay. In addition, midterms will have questions based on the reading material.

Audio-Visual Media Sources: There are videos listed for each week in the syllabus. These audio-visual media materials are assigned to enhance both your understanding of each week's topics as

well as your audio-visual media literacy skills. Parts of these media can be used in the discussion sections as well.

Bonus video assignment: Technical issues will not be accepted as excuses for not submitting any writing assignments or examinations on time. Additional time (with penalty) for such issues is already provided for some components of this course. Nevertheless, to make up for any lost points a read, listen and record assignment will be provided for a total of 6 points. Several videos will be provided by the course lecturers commenting on one of the course readings accompanied by a set of questions. Students will be expected to record a 5-minute long response to the question provided in the lecturer's video. This assignment will be available on SUCourse by week 3. Please see the SPS 102 Bonus Assignment Guidelines on SUCourse for more details.

Make-Up Policy: No make-ups are allowed for research essay proposals and process essays. Late submissions for process essays are allowed only for a single day (until 23:55 of the next day after the original deadline) but there is a penalty for late submissions (5% deduction from your course grade). Make-ups are only allowed for midterms to those with an official report from or approved by the University Health Center for the date of the exam in question and those with an official permission notice from the university for participation in a university event on the date of the exam in question. Students are not allowed to take any form of examination or submit any assignments on days that they have documented excuses. No exceptions will be made to these rules. The make-up exam will be cumulative, meaning that students will be responsible for the content of the entire course in the makeup exam. The format of the makeup exam may be different from the midterms too. There will be no make-up for the makeup exam. For the discussion worksheets, students with an official report from or approved by the University Health Center or an official permission notice from the university for participation in a university event for the date of a discussion section will receive the average points they have received for their other section worksheets throughout the semester only if less than 5 graded worksheets are present for the entire semester. Those who already have a minimum of 5 worksheet grades will not have make-up adjustments in their grades.

Objection Policy: Students are only allowed to object to their midterm and paper assignment grades. Bargaining about grades is absolutely not tolerated. All objections must have a solid basis. They must be submitted by email to the relevant facilitator and must be followed by an (online) meeting. The facilitators who graded the assignment in question initially assess the objections. The SPS course coordinator will make a second assessment if need be. All objections must be made within the announced periods of time.

Assigned Readings: The SPS102 reader includes all the required readings listed below and these readings will be accessible from the SUCourse web page of the course. Readings should be done before the class for which they are assigned. See the schedule of readings and lectures below.

Grading Scale: Final grades will be calculated using the following point distribution:

90-100	A
86-89	A-
82-85	B+
78-81	B
74-77	B-
70-73	C+
66-69	C
62-65	C-
58-61	D+
54-57	D
0-53	F

Academic Integrity: Cases of plagiarism and cheating will automatically be penalized with a 0 (zero) from the assignment/ examination and also the entire grade component related to that

assignment/examination. In addition to that, these cases will be directly referred to the Dean's Office for disciplinary action. Students might be called for an authenticity interview for any of the assignments of this course if deemed necessary by the instructors. It should be noted that using (a part of) an assignment or exam submitted before to this or another course is not allowed and is considered as self-plagiarism. Please also be informed that overreliance on external editing and proofreading will be penalized accordingly. This SPS course does not tolerate any breach of academic integrity. For the university's Academic Integrity Statement, see:

Golden rules for Discussion Sessions

- Don't be late

No students are allowed into the classroom after the first 10 minutes. Be punctual and respect the classroom etiquette.

- Communicate in English

Language is best learned with practice. Discussion sessions are safe environments to make mistakes and ask questions. Use this opportunity and communicate in English.

- Be patient and follow the instructions

You will be writing, listening, reading and talking a lot in an academic environment. It will initially feel intimidating and hard. Be patient, follow the instructions and work hard. Your language skills will improve throughout the semester, and you will find things easier as you get used to the assignments, the terminology, and the overall logic of the course.

How to follow your grade performance

Freshman year can be overwhelming and demanding. It is always wise to keep a close track of your own performance throughout the course. Below is a simplified formula that will help you predict or calculate your grade. This formula is just a helping tool. It is not definitive and subject to change. Please make sure to consult the actual grading rubric and/or the course coordinator for more accurate information. The formula is as follows:

MT: Midterm examination

(Sum of best 5 discussion worksheet grades) + [(MT1 x 0.20) + (MT2 x 0.25)] + (Sum of writing assignment components) + (sum of Top Hat) + (bonus video assignment)
