Course Description: This course provides an introduction to the study of the human experience in the pre-modern world. It brings together various disciplinary approaches and major topics of the pre-modern world in a roughly chronological order. There are three central aims of this course. The first aim is to present our students the challenges and potential in the scientific study of human experience through the introduction of various analytical tools from disciplines such as history, sociology, anthropology, and economics. The idea is to show to our students that the human experience is as much the realm of scientific inquiry and critical thinking as it is the case with the natural world. The second aim is to introduce the basic dynamics of the pre-modern world before the 18th century so that students would be adequately equipped to follow our consecutive course SPS 102 about the modern era and the concept of modernity. Finally, this course also aims to emphasize the structured use of language, in this case English, for the purposes of knowledge production and critical analysis. It accepts the role of language in humanities and social sciences as important as calculus is for physics. To that end, it pays special attention to critical reading and writing as evident from the course structure.

Grading: The components of the final course grade are as follows:

Midterm examinations:	45%	(1 st midterm 20%, 2 nd midterm 25%)
Writing Assignments:	30%	(Summary Paper: 10% + Response Paper: 20%)
Discussion sessions:	20%	(Twelve discussion weeks, of which eight are graded, five best will count x 4% each)
In-lecture Top Hat questions:	5%	(Five random <i>Top Hat</i> questions x 1% each)
Bonus video assignment:	6%	(Read, listen and record assignment)

Course Requirements: Students are expected to complete the assigned readings before each lecture and actively participate in discussion sections, take two midterm exams, and submit a summary paper and response paper. No mandatory attendance is taken for the lectures, but students who miss more than six discussion sections (or more than 12 discussion hours) will automatically get a zero from all their discussion section grades. In addition, those who miss five or more discussion sections and both midterm examinations without a valid excuse will fail the course and be considered NA. Attend your discussions on time, late attendance (10 minutes rule) will not be tolerated.

Course Components:

Midterm examinations: There will be two midterm examinations in this course to be conducted face-to-face on campus. In terms of the examination format, each midterm will consist of short questions and long essay questions. Students will be graded based on their comprehension of the content and their ability to formulate analytical arguments based on that content from the readings,

lectures, and discussion sections. Please note that only the students with valid excuses approved by the Academic Board decisions will be allowed to take online exams on exceptional occasions. These online exams will be proctored, and your webcam and microphone should be on during the exam. In the case of non-compliance with this and other declared exam procedures, your exam will be void.

Writing Assignments: Students are expected to complete two writing assignments based on the readings of this course. The first step of this component is the in-class submission of a summary paper (week 3), and the second step is the online submission of a response paper (week 6). Both writing assignments are considered as (take-home) exams. Each step is graded separately. These assignments will prepare you for the more advanced academic writing assignments of our follow-up course SPS 102. Please make sure to read 'SPS 101 Writing Assignments guidelines' on SUCourse for more details.

Discussion sessions: Discussion sessions are student-centered learning hours conducted by SPS facilitators. There will be a total of twelve discussion sessions. Every discussion session will consist of two hours and of these twelve sections, eight random sections will have graded exercises, which will be submitted to SUCourse by the end of the discussion hour. To this end students are expected to bring their (fully charged) laptop or tablet (no phone!) to the discussion class. The five best of these eight will be counted towards your grade. The other four sections will be discussion and skills-learning based meetings. The graded weeks will be worth 4% each. Students are expected to watch the recorded tutorial videos before the discussion sections. Students may also be asked to finish one or more of the assigned readings before the discussion sections. Attendance will be taken regularly during each hour of the discussion sessions. Students who miss more than six discussion sections (or more than 12 discussion hours in total) will automatically get a zero from all their discussion section grades. Students will not be allowed into the discussion sections after ten minutes following the start of the section meeting. No exceptions will be made to this rule.

Lectures: Lectures constitute the backbone of this course. They are central to the design of the course and the content delivered in the lectures will be tested in the midterm examinations. Lecture attendance is not mandatory, but five random in-lecture questions will be asked at random lecture hours throughout the course through the Top Hat system. These are small quizzes that aim to test your comprehension of the lecture and they are not conducted for attendance. Cheating will not be tolerated. Students will not be allowed in the classroom after the first 10 minutes of the lectures. Those who are late to the class and are not admitted to the lecture hall can follow the second hour of the lecture after the break.

Reading assignments: Students are expected to do all the readings. Readings are designed to be complementary to the lectures and discussion sessions. A better understanding of any topic is only possible by completing the readings and they are a great source for the writing assignments. In addition, midterms will have questions based on the reading material.

Audio-Visual Media Sources: There are videos listed for each week in the syllabus. These audio-visual media materials are assigned to enhance both your understanding of each week's topics as well as your audio-visual media literacy skills. Parts of these media can be used in the discussion sections as well.

Bonus video assignment: Technical issues will not be accepted as excuses for not submitting any writing assignments or examinations on time. Additional time (with penalty) for such issues is already provided for some components of this course. To make up for any lost points a read, listen and record assignment will be provided for a total of 6 points. A video will be provided by the course lecturers commenting on one of the course readings accompanied by a set of questions. Students will be expected to record a 5-minute-long response to the question provided in the lecturer's video. This assignment will be available on SUCourse by week 3. Please see the SPS 101 Bonus Assignment Guidelines on SUCourse for more details.

Make-Up Policy: Make-ups are only allowed for midterms and assignments to students with an official report from or approved by the University Health Center for the date of the exam / assignment in question and those with an official permission notice from the university for participation in a university event on the date of the exam / assignment in question. Students are not allowed to take any form of examination or submit assignments on the days that they have documented excuses. No exceptions will be made to these rules. The makeup exam will be cumulative, meaning that students will be responsible for the content of the entire course in the makeup exam. The format of the makeup exam may be different from the midterms too. There will be no makeup for the makeup exam. The makeup assignment for the paper assignments is cumulative. Late submissions for the Response Paper are allowed only for 3 hours after the initial deadline, but there is a penalty. For the discussion worksheets, students with an official report from or approved by the University Health Center or an official permission notice from the university for participation in a university event for the date of a discussion section will receive the average points they have received in their other section worksheets throughout the semester only if less than 5 graded worksheets are present for the entire semester. Those who already have 5 worksheet grades will not have make-up adjustments in their grades.

Objection Policy: Students are only allowed to object to their midterm and writing assignment grades. Grade bargaining is absolutely not tolerated. All objections must have a solid basis. Objections must be submitted by email to the relevant facilitator and must be followed by an (online) meeting. The facilitators who graded the assignment in question initially assess the objections. The SPS course coordinator makes a second assessment if need be. All objections must be made within the announced periods of time.

Assigned Readings: The SPS 101 reader includes all the required readings listed below and these readings will be accessible from the SUCourse web page of the course. Readings should be done before the lecture for which they are assigned. See the schedule of readings and lectures below.

Grading Scale: Final grades will be calculated using the following point distribution:

90-100	A
86-89	A-
82-85	B+
78-81	B
74-77	B-
70-73	C+
66-69	C
62-65	C-
58-61	D+
54-57	D
0-53	F

Academic Integrity: Cases of plagiarism and cheating will automatically be penalized with a 0 (zero) from the assignment/ examination and also the entire grade component related to that assignment/examination. In addition to that, these cases will be directly referred to the Dean's Office for disciplinary action. Students might be called for a random oral interview for any of the assignments of this course if deemed necessary by the instructors. It should be noted that using (a part of) an assignment or exam submitted before to this or another course is not allowed and is considered as self-plagiarism. Please also be informed that overreliance on external editing and proofreading will be penalized accordingly. This SPS course does not tolerate any breach of academic integrity.

For the university's Academic Integrity Statement, see:

Important Disclaimer: Amendments could be made to this syllabus. Please follow email and SUCourse announcements throughout the semester.

Golden rules for Discussion Sessions

- Don't be late

No students are allowed into the classroom after the first 10 minutes. Be punctual and respect the classroom etiquette.

- Communicate in English

Language is best learned with practice. Discussion sessions are safe environments to make mistakes and ask questions. Use this opportunity and communicate in English.

- Be patient and follow the instructions

You will be writing, listening, reading and talking a lot in an academic environment. It will initially feel intimidating and hard. Be patient, follow the instructions and work hard. Your language skills will improve throughout the semester, and you will find things easier as you get used to the assignments, the terminology, and the overall logic of the course.

How to follow your grade performance

Freshman year can be overwhelming and demanding. It is always wise to keep a close track of your own performance throughout the course. Below is a simplified formula that will help you predict or calculate your grade. This formula is just a helping tool. It is not definitive and subject to change. Please make sure to consult the actual grading rubric and/or the course coordinator for more accurate information. The formula is as follows:

MT: Midterm examination

(Sum of best 5 discussion worksheet grades) + [(MT1 x 0.20) + (MT2 x 0.25)] + (Sum of writing assignment components) + (sum of Top Hat) + (bonus video assignment)
