TEACHING METHOD
The lectures will be physical.

TEXTBOOK
We will not have a textbook. However, if you like, you can read the following book.

COURSE CONTENT AND LEARNING OUTCOME

- Basics of Module theory

- Field extensions, in particular finite algebraic extensions
- Normal, separable extensions, splitting fields
- The notion of extending field embeddings
- Galois extensions and Galois groups
- The fundamental theorem of Galois theory
- Cyclic and abelian extensions
- The fundamental theorem of Algebra (if time allows)

**GRADING**
2 Midterm: %30 each
1 Final: %40
Locations and times of the exams will be announced in fashionable time.

**EXAM POLICY**
There will be 2 Midterms and 1 Final during the semester. Midterms and final exams will be in the form of a written exam, in-person, and on campus. The exams are closed book. This means that during the exam, the use of books, notes, electronic devices (including cell phones, smart watches, calculators, computers, etc.), or any other kind of supporting learning material is NOT allowed. A student violating this rule will receive 0 points for that exam.

**MAKE-UP EXAMS**
If a student misses an exam, then either s/he has to have a medical report by Sabancı Medline covering the exam date or contact the instructor immediately explaining your situation. Otherwise, it will be counted as “0”.
